 **PennMutual.**

You don't just stumble upon a perfect retirement.

Smart Foundation Variable Annuities

These tools can help you grow and manage your retirement savings. They're highly customizable insurance products that can help ensure you'll have a steady stream of income when you retire. Look at you, getting stronger already.

What it means for you:

Guaranteed Income For Life

Annuity products are the *only* ones offering guaranteed income for life. And you can choose income for you or for you and your spouse or legal domestic partner.¹

Unlimited Growth Potential

Through variable investments (equity and bond) options, you can benefit from unlimited growth potential.²

¹All guarantees are based on the claims-paying ability of the issuer.

²Investments are subject to market fluctuations and may lose value.

Please see page 8 for important information and disclosures.

Tax-Deferred Growth

Because your earnings are not taxed until you begin taking an income, your annuity can grow quicker than a taxable asset.

Optional Benefits

A very appealing aspect of Smart Foundation is the ability to customize your annuity with optional income and protection features for an additional charge.

Death Benefit

Every Smart Foundation Variable Annuity also includes a death benefit to help protect your beneficiaries.¹

Penalty-Free Withdrawals

Withdrawal up to 10% of premium payments annually without surrender charges. Medical or disability related withdrawals are available. Ask your financial professional for details about the availability of penalty-free withdrawals.

¹The death benefit is adjusted for any rider charges.

Please see page 8 for important information and disclosures.

“Tax deferral” might be the greatest combination of words in the English language.

Tax Advantages and Strong Growth Potential

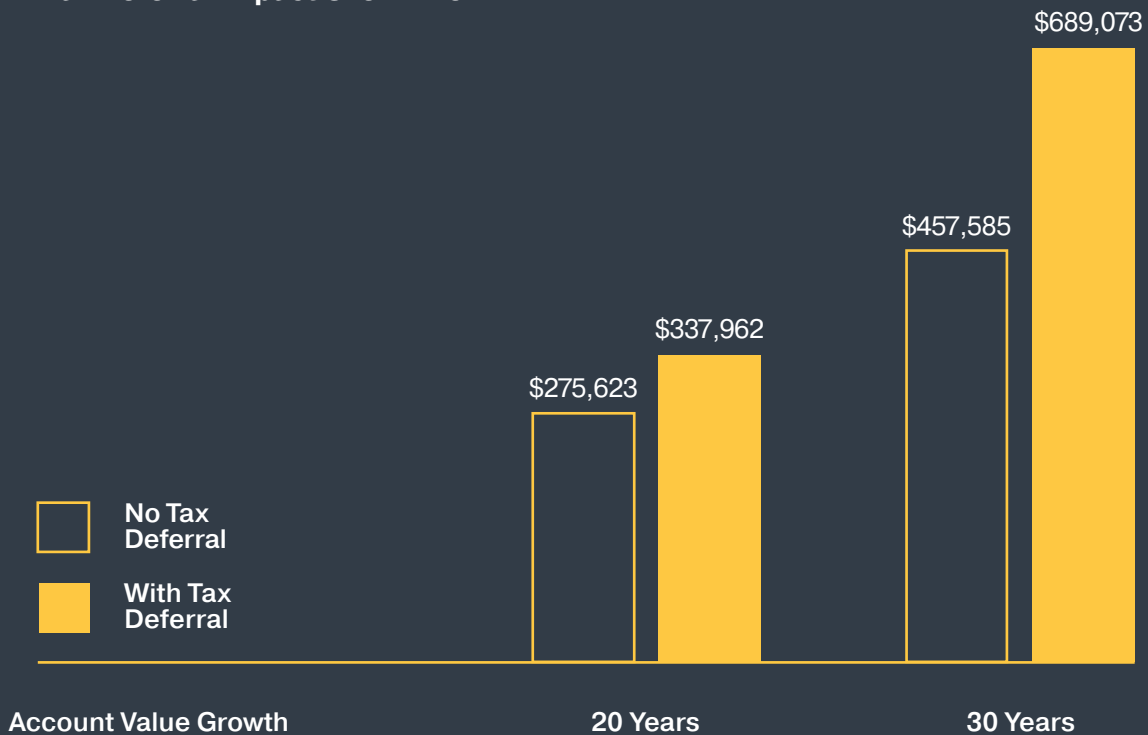

Tax deferral is one of the main advantages of variable annuities, because it allows your entire investment plus earnings to compound tax-free until retirement.

Think of it this way: the longer the annuity remains in the accumulation phase, the greater the impact of tax deferral.

Visual learner? Here’s a hypothetical example:

This graph shows the impact of tax deferral on an initial investment of \$100,000 over 20 and 30 years. It assumes an 8% annual investment return and a 35% income tax rate.¹

Tax Deferral Impact Over Time

¹This hypothetical example does not reflect the actual performance of any investment or negative market return years which could impact results. Product fees and charges, including surrender charges, will reduce values. Your results will vary.

Please see page 8 for important information and disclosures.

Diversify, Diversify, Diversify

Build a Custom Portfolio or Get Built-In Diversity and Discipline¹

Create and manage a customized investment portfolio by choosing from a variety of fund choices all managed by experienced investment firms. Here's a high-level look at some of the fund categories available.

Large Cap	SMID Cap	Specialty
Mid Cap	International	Fixed Income
Small Cap	Balanced	Asset Allocation Funds

Options Designed to Help Minimize Risk

Dollar Cost Averaging Account

Directing payments to this fixed interest account can help reduce the impact of market fluctuations. Each month, a portion of the values in the account will be moved to the investment options you selected. This account doesn't guarantee better returns, but can help reduce the impact of poor market performance at a specific point in time.

Fixed Account

If you prefer a predictable, guaranteed rate of return for a portion of your annuity values, Smart Foundation Variable Annuities offer three, five or seven year fixed account options.

**You,
Stronger.**

Your Penn Mutual financial professional can provide details about all of the investment options so you can decide what's right for you.

¹Portfolio diversification cannot guarantee a positive rate of return.

Please see page 8 for important information and disclosures.

Tweak your retirement to your extremely specific needs.

One of the most appealing aspects of Smart Foundation Variable Annuities is the ability to tweak them with optional benefits, also known as riders. You can add these riders to your annuity to help you personalize it for your specific needs.

Below is a breakdown of the four available optional benefits:

Benefit Option	What's In It for You
Guaranteed Growth and Income Benefit Rider	Ensures that the amount used to determine your income is guaranteed to grow and won't lose value from market losses.
Inflation Protector Withdrawal Benefit Rider	Helps protect you against rising costs and the impact of inflation by automatically increasing the amount used to determine your income by up to 6% annually.
Enhanced Death Benefit Rider	Locks-in the death benefit with market gains and protects it from market drops.
Guaranteed Minimum Accumulation Benefit Rider II	Guarantees your minimum contract value will be up to 100% of the premium you paid, regardless of market performance. ¹

Some things to know:

Optional benefits are available for an additional charge and may not be available in combination. Increases under the Inflation Protector Withdrawal Benefit Rider are based on the Consumer Price Index for all Urban Consumers (CPI-U).

¹The annuity contract value and accumulation benefit base will be adjusted for any withdrawals.

Please see page 8 for important information and disclosures.

Disclosures

All guarantees are based on the claims-paying ability of the issuer.

Guarantees do not relate to the performance of the variable investment options. A variable annuity is a long-term financial retirement vehicle, subject to market fluctuations. It may lose value, including the potential loss of principal, and is subject to certain fees and expenses not normally associated with other investment vehicles. Withdrawals are subject to contract provisions and will reduce the contract value, the amount used to calculate withdrawal or income payments and death benefit amounts. Withdrawals may be subject to income taxes and surrender charges; and, when taken before age 59 1/2, may be subject to an additional 10 percent penalty tax.

Consult your trusted financial professionals before taking income or other withdrawals. If the annuity contract is held in a qualified account or plan, such as an IRA, the tax deferral feature provides no additional benefits beyond that provided by the qualified account or plan. Any reference to the taxation of the products in this material is based on Penn Mutual’s understanding of current tax laws. Penn Mutual and its representatives do not provide tax or legal advice. For specific questions about your personal situation, you should consult your tax advisor.

Product and/or features may not be available in all states. Policy form number: ICC11-VA-C. Rider form numbers: Guaranteed Growth and Income Benefit ICC11-GLWB-C; Inflation Protector Withdrawal Benefit ICC14-IPWB; Enhanced Death Benefit ICC11-GMDB-C; Guaranteed Minimum Accumulation Benefit ICC21-GMAB. Form numbers may vary by product and state. Optional benefits may incur additional charges and may not be available in combination.
