NOTE 20 Fair Value Measurements
A.
(1) Fair Value Measurements at Reporting Date

The Company's financial assets have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100-Fair Value Measurements. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification is based on the lowest level input that is significant to its measurement. The following are the levels of the hierarchy and a brief description of the type of valuation inputs that are used to establish each level:

Pricing Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets that the Company's pricing sources have the ability to access. Since the valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant amount or degree of judgment.

Pricing Level 2 - Valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where the significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.

Pricing Level 3 – Valuations that are derived from techniques in which one or more of the significant inputs are unobservable, including broker quotes which are non-binding.

The following presents the Company's fair value hierarchy for assets and liabilities that are carried at fair value:

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

The following fair value methods and assumptions were used by the Company in estimating the fair value disclosures for financial instruments:

Cash and Cash Equivalents: The admitted asset amounts approximate their fair value due to their short-term nature.

Investment Securities: Fair values for investment securities are based on market prices published by the SVO, or in the absence of SVO published unit prices or when amortized cost is used by the SVO as the unit price, quoted market prices by other third party organizations, where available. For fixed maturity securities not actively traded, fair values are estimated using values obtained from independent pricing services. The following presents a summary of the carrying values and fair values of the Company's financial instruments:
