NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Vantis Life Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Connecticut Insurance Department.

The Company recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Connecticut Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Connecticut. The state has adopted certain prescribed accounting practices that may differ from those found in NAIC SAP.

At the time of Codification (fiscal year 2001), the Company was writing premium exclusively in the State of Connecticut, a state where the Valuation of Life Insurance Policies Model Regulation (Regulation XXX) has not been adopted. As a result, for some of its individual level term life insurance policies, the Company currently holds a Gross Premium Valuation (GPV) reserve subject to a floor of the larger of the unitary basis reserves and "1/2 cbarx", as prescribed by the State of Connecticut. The GPV reflects realistic assumptions for lapses, mortality, and expenses, adjusted for potential adverse deviations and valuation assumptions for interest rates.

The current reinsurance arrangement is 80% first dollar quota share yearly renewable term on these policies. If Regulation XXX reserves had been held, the reinsurance arrangement would have been 80% or 90% first dollar quota share coinsurance, thus reducing the reserve impact by 80% or 90%.

The current retained reserve is \$5,802,406. If these contracts had been 90% reinsured on a coinsurance basis and Regulation XXX reserves were held, the retained reserve would be \$3,203,699.

The following table compares GPV reserves (gross of reinsurance) for such policies issued since 2001 and the corresponding Regulation XXX reserves (pursuant to the revised Standard Valuation Law approved by the NAIC). The Company does not have an exposure to the difference shown below as the State of Connecticut has not adopted Regulation XXX. Were Connecticut to adopt Regulation XXX in the future, the Company's view is that it could not do so retroactively, as this would necessitate unwinding of the policies and the associated reinsurance.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with the NAIC Annual Statement Instructions and NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received.

Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholders' dividends is related to actual interest, mortality, morbidity, and expense experience for the year and judgment as to the appropriate level of statutory surplus to be retained by the Company.

In addition, the Company uses the following accounting policies:

(1) Basis for Short-Term Investments

Short-Term Investments are stated in accordance with the guidance provided in SSAP No. 2R - Cash, Cash Equivalents, Drafts, and Short-Term Investments.

NOTE 20 Fair Value Measurements

A.

(1) Fair Value Measurements at Reporting Date

The Company's financial assets have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100-Fair Value Measurements. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification is based on the lowest level input that is significant to its measurement. The following are the levels of the hierarchy and a brief description of the type of valuation inputs that are used to establish each level:

Pricing Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets that the Company's pricing sources have the ability to access. Since the valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant amount or degree of judgment.

Pricing Level 2 - Valuations based upon quoted prices for similar assets in active markets. quoted prices for identical or similar assets in inactive

markets; or valuations based on models where the significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.

Pricing Level 3 – Valuations that are derived from techniques in which one or more of the significant inputs are unobservable, including broker quotes which are non-binding. The following presents the Company's fair value hierarchy for assets and liabilities that are carried at fair value:

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

Cash and Cash Equivalents:

The admitted asset amounts approximate their fair value due to their short-term nature.

Investment Securities:

Fair values for investment securities are based on market prices published by the SVO, or in the absence of SVO published unit prices or when amortized cost is used by the SVO as the unit price, quoted market prices by other third party organizations, where available.

For fixed maturity securities not actively traded, fair values are estimated using values obtained from independent pricing services, or in the case of private placements, are estimated by discounting the expected future cash flows using current market rates applicable to the coupon rate, credit and maturity of the investments.

The following presents a summary of the carrying values and fair values of the Company's financial instruments:
