NOTE 20 Fair Value Measurements
A. (1) Fair Value Measurements at Reporting Date

The Company's financial assets have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100-Fair Value Measurements. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification is based on the lowest level input that is significant to its measurement. The following are the levels of the hierarchy and a brief description of the type of valuation inputs that are used to establish each level:

Pricing Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets that the Company's pricing sources have the ability to access. Since the valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant amount or degree of judgment.

Pricing Level 2 - Valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where the significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.
