

Penn Insurance and Annuity Company

Variable Fund Performance

The funds listed below are the underlying investment vehicles for the separate account funding Penn Insurance and Annuity's variable insurance products and are not available to the public for direct investment. The performance results shown below reflect fund level fees and expenses, and reinvestment of dividends and distributions. Returns do not include any policy fees or expenses, which include premium loads, cost of insurance, policy administrative fees and charges, mortality and expense risk charges, surrender charges, or any other charges that may be incurred under the policy. Returns would have been lower after all policy fees and expenses are deducted. Policy fees and expenses vary by product, and some fees and expenses, such as cost of insurance, will vary according to insured's age, sex distinct or unisex rates, smoking status, face amount, and any applicable substandard rating.

This information should be preceded or accompanied by a prospectus for the relevant insurance contract and its underlying investment options. Please refer to the prospectus for detailed information. Your personalized illustration, which reflects the effect of the policy fees and expenses with a hypothetical rate of return, and is available from your financial professional. The performance data quoted is past performance and is not indicative of future results. The investment return and principal value of the investment options will fluctuate so that units, if redeemed, may be worth more or less than their original cost. For current month-end performance of all investment options available through Penn Mutual's variable insurance products, see www.pennmutual.com.
