NOTE 1 Summary of Significant Accounting Policies and Going Concern

Accounting Practices

The financial statements of Vantis Life Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Connecticut Insurance Department

The Company recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Connecticut Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Connecticut. The state has adopted certain prescribed accounting practices that may differ from those found in NAIC SAP.

At the time of Codification (fiscal year 2001), the Company was writing premium exclusively in the State of Connecticut, a state where the Valuation of Life Insurance Policies Model Regulation (Regulation XXX) has not been adopted. As a result, for some of its individual level term life insurance policies, the Company currently holds a Gross Premium Valuation (GPV) reserve subject to a floor of the larger of the unitary basis reserves and "1/2 cbarx", as prescribed by the State of Connecticut. The GPV reflects realistic assumptions for lapses, mortality, and expenses, adjusted for potential adverse deviations and valuation assumptions for interest rates.

The current reinsurance arrangement is 80% first dollar quota share yearly renewable term on these policies. If Regulation XXX reserves had been held, the reinsurance arrangement would have been 80% or 90% first dollar quota share coinsurance, thus reducing the reserve impact by 80% or 90%. The current retained reserve is \$6,283,413. If these contracts had been 90% reinsured on a coinsurance basis and Regulation XXX reserves were held, the retained reserve would be \$3,971,632.

The following table compares GPV reserves (gross of reinsurance) for such policies issued since 2001 and the corresponding Regulation XXX reserves (pursuant to the revised Standard Valuation Law approved by the NAIC). The Company does not have an exposure to the difference shown below as the State of Connecticut has not adopted Regulation XXX. Were Connecticut to adopt Regulation XXX in the future, the Company's view is that it could not do so retroactively, as this would necessitate unwinding of the policies and the associated reinsurance.

	3/31/2022	12/31/2021
GPV Reserves:	9,982,136	10,096,923
Regulation XXX Reserves:		
Basic Reserves	39,715,266	40,550,631
Deficiency Reserves	1,051	2,434
Total	39,716,316	40,553,065
Difference	29,734,180	30,456,142

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Connecticut is shown below:

NOTE 20 Fair Value Measurements

(1) Fair Value Measurements at Reporting Date

(1) Fair Value Measurements at Reporting Date
The Company's financial assets have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100-Fair Value
Measurements. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets
(Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification
is based on the lowest level input that is significant to its measurement. The following are the levels of the hierarchy and a brief description of the type of
valuation inputs that are used to establish each level:

Pricing Level 1 - Valuations based on unadjusted quoted prices in active markets for identical assets that the Company's pricing sources have the ability to access. Since the valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant amount or degree of judgment.

Pricing Level 2 - Valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where the significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data

Pricing Level 3 - Valuations that are derived from techniques in which one or more of the significant inputs are unobservable, including broker quotes which are non-binding

The following presents the Company's fair value hierarchy for assets and liabilities that are carried at fair value:

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Ne	t Asset Value (NAV)	Total

- (4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement Not applicable
- B. Fair Value Reporting under SSAP 100 and Other Accounting Pronouncements

As of March 31, 2022, the Company maintained no bonds rated NAIC 6.

As of March 31, 2022, the reported fair value of the Company's investment in Level 3 common stock included an investment in a non-affiliated entity of \$35,500.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

Investment Securities:Fair values for investment securities are based on market prices published by the SVO, or in the absence of SVO published unit prices or when amortized cost is used by the SVO as the unit price, quoted market prices by other third party organizations, where available. For fixed maturity securities not actively traded, fair values are estimated using values obtained from independent pricing services.

Mortgage Loans: The fair value of the Company's mortgage loan portfolio is based on the present value of future cash flows at prevailing interest rates.

The following presents a summary of the carrying values and fair values of the Company's financial instruments:

Type of Financial Instrument	Aggregate Fair Value	A	dmitted Assets	(Level 1)	(Level 2)	(Level 3)	Ne	et Asset Value (NAV)	Practicable
